WHEN YOU WAKE **UP DRINK GLASS** OF HOT WATER

Wash the poisons and toxins from system before putting more food into stomach.

Says Inside-bathing makes anyone look and feel clean, sweet and refreshed.

Wash yourself on the inside before breakfast, like you do on the outside. This is vastly more important, because the skin pores do not absorb impurities into the blood, causing illness, while the bowel pores do.

For every ounce of food and drink taken into the stomach, nearly an ounce of waste material must be carried out of the body. If this waste material is not eliminated day by day, it quickly ferments and generates poisons, gases and toxins, which are absorbed or sucked into the blood stream through the lymph ducts, which should suck only nourish-

ment to sustain the body. A splendid health measure is to drink before breakfast each day, a glass of real hot water with a tenspoonful of limestone phosphate in it, which is a harmless way to wash these poisons, gases and toxins from the stomach, liver, kidneys and howels; thus cleansing, sweetening and freshening the entire aliment- youthful audience an object lesson in ary canal before putting more food into various forms of patriotic service, the bath, you just feel the happiness soaking talking and preaching about liquor laws As a result there is real war again.
